Javascript Full stack developer building responsive and single page web applications using **ReactJS-Redux**, **NodeJS**, **Express**, **MongoDB** and **Socket.io** with good user experience in an agile environment.

Summary

- Good experience in building applications using **MERN** stack using complex JavaScript (ES6/7).
- Experience in developing web pages using **React JS**, **Redux**, **Thunk**, **NodeJS**, **Express** and **MongoDB**, **Socket.io**, **JSON**, **Ajax** and **Bootstrap**, **JSX**, **HTML5**, **CSS3** and **sendgrid**.
- Experience in all phases of SDLC like Requirement Analysis, Implementation and Maintenance, and experience with Agile process and SCRUM model method.
- Experience in creating components using **React-Redux** and single - page applications (SPA)
- Basic understanding of search engine optimization techniques (SEO)
- Good hands on experience in designing backend using **NodeJS**, **Express** and **MongoDB** and good understanding of **HTTP protocol** and standards.
- Hands on experience in designing security features using **OAuth**, **Bcrypt** and **JWT**
- Good Expertise in analyzing the Document Object Model (DOM) Layout, DOM Functions, Cascading Styles across cross-browser using Developer Tool Bar.
- Experience in using **React JS components**, **State**, **Forms**, **Events**, **Router**, **React Hooks** and **Redux**
- Experience in developing and integrating front-end and back-end applications.
- Proficient in using unit testing framework with Jest test runners.
- Good experience accessing external **APIs** using **Axios** using **Thunk** for asynchronous data access.
- Proficiency across **Redux concepts** and implementation of Redux store and state.
- Good understanding of NodeJS architecture - **V8 engine**, **LibUV**, **event loop** etc.
- Experience in version control tool **GIT** for source code version management on **GitHub**.
- Expertise in using IDE tools such as **VS Code** and **Notepad ++**
- Good communication skills with the ability to communicate technical and non-technical teams
- Excellent knowledge of **JavaScript concepts** and popular libraries and frameworks.

Technical Skillset

Web Technologies: React JS, Redux, NodeJS, Express, MongoDB, JSX, HTML5, CSS3, Bootstrap, Webpack, AJAX

Programming languages: JavaScript - ES6/ES7 and strong Object-Oriented Concepts

Backend/Web Servers: NodeJS and Express

Database: MongoDB

IDEs: VS Code

Test tools and frameworks: Jest

Version control systems: Git/GitHub/BitBucket

Operating Systems: Windows 10

Cloud platforms: Heroku,aws,netlify..

CI/CD: Jenkins

Methodologies: Agile

Employment history:

Javascript Full stack Developer- Freelancer: July 2019 - Till date

Professional Experience

V-Doctors - virtual hospitality – OnGoing Project

Ananya engineers – construction Company

Trinetra Web Technologies –InHouse Project

Roles and Responsibilities:

- Developed user interface by using the **React JS, Redux for SPA** (single page application) development.
- Designed Single Page Application using **React-Router** and maintained states using **Redux**
- Designed and developed backend **APIs using NodeJS, Express and MongoDB.**

- Used **Postman** to test the validity of the responses from the backend.
- Integrated frontend and backend and used **RESTful Web services** for transmission of large blocks of JSON.
- Working with **Restful web services** calls for **POST, PUT, DELETE** and **GET** methods.
- Used **Axios** and **Thunk** to access external APIs for asynchronous data access and Redux store for state maintenance.
- Designing security features using **OAuth, Bcrypt for authenticity** and **JWT** for session management.
- Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application.
- Responsible for checking cross browser compatibility and hence worked on different browsers **Chrome, Firefox** and **Internet Explorer**.
- Working on **Git** for version controlling and regularly maintained the code on **GitHub**.
- Used **JIRA** as the collaboration and bug tracking system to maintain the tasks and history of bugs/issues
- used **SENDGRID** for cloud-based email service that provides reliable transactional email delivery.
- Worked with **Jest** unit test framework to write unit tests for JavaScript code.
- Extensively used debugging tools such as **Chrome Dev tools** to investigate the issues and fix the bugs.
- Worked in DevOps environment for continuous integration and continuous deployment using Heroku
- Worked on **Socket.io** implementation for persistent client and server communications.
- Collaboration with Testing Team, Scrum Master and Business Analysts, product owner in an Agile development.
- Performed the **Unit testing** and Regression Testing for Complete UI after fixing the issues

Environment: React JS, Redux, NodeJS, Express, MongoDB, CSS3, JavaScript, JSX, Bootstrap, Webpack, Ajax, JSON, Git Hub, Restful APIs, Heroku, JIRA, Jest, Socket.io, sendgrid and VS code.

Education: Bachelor of Computer Science NEFTU- [**North East Frontier Technical University**](#)
